The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12-17 are rejected under 35 U.S.C. 102(B) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over each of Reeve (U.S. Patent No. 5,800,711) and Reeve (U.S. Patent Publication No. 2002/0137973). The claims are considered to read on each of Reeve (U.S. Patent No. 5,800,711) and Reeve (U.S. Patent Publication No. 2002/0137973). However, if a difference exists between the claims and each of Reeve (U.S. Patent No. 5,800,711) and Reeve (U.S. Patent Publication No. 2002/0137973), it would reside in optimizing the elements of each of Reeve (U.S. Patent No. 5,800,711) and Reeve (U.S. Patent Publication No. 2002/0137973). It would have been obvious to optimize the elements of each of Reeve (U.S. Patent No. 5,800,711) and Reeve (U.S. Patent Publication No. 2002/0137973) to enhance separation.

Claims 12-17 are rejected under 35 U.S.C. 102(B) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over each of Berg (U.S. Patent No. 6,448,371), Landh (U.S. Patent No. 5,531,925), and Schwarz (U.S. Patent No.

Art Unit: 1723

2005/0008610). The claims are considered to read on each of Berg (U.S. Patent No. 6,448,371)'s column 1, lines 14-17 purified poloxamer 407, Landh (U.S. Patent No. 5,531,925)'s column 11, lines 42-43 purified poloxamer 407, and Schwarz (U.S. Patent No. 2005/0008610)'s paragraph 176 purified poloxamer 407. However, if a difference exists between the claims and each of Berg (U.S. Patent No. 6,448,371), Landh (U.S. Patent No. 5,531,925), and Schwarz (U.S. Patent No. 2005/0008610), it would reside in optimizing the elements of each of Berg (U.S. Patent No. 6,448,371), Landh (U.S. Patent No. 5,531,925), and Schwarz (U.S. Patent No. 2005/0008610). It would have been obvious to optimize the elements of each of Berg (U.S. Patent No. 6,448,371), Landh (U.S. Patent No. 5,531,925), and Schwarz (U.S. Patent No. 2005/0008610) to enhance separation.

The remarks urge that the examination of an additional invention would not be an undue burden on the examiner. However, the additional search and different issues of patentability would be an enormous burden on the examiner. As such, the restriction requirement has been reconsidered, deemed proper, and made final for the reasons of record.
